

## **A WELL WRITTEN LETTER TO LEGISLATORS**

Hello Legislators,

All of us regular people that got you voted in last session THANK YOU PROFUSELY for your courage in the face of the entitled class that have been taking advantage of all of the rest of us with their political pals.

For once, as a small business owner, father with 3 children in High School and college, and an economically productive citizen my whole life, I actually am getting some political representation.

I have been absolutely marauded by these folks financially. Both on the federal level and state level. I have paid for my own health insurance since 1995 with an HSA since 2002. Needless to say, Doyle has made my mission to secure medical insurance for my family that much harder.

Keep Going!

We are still going to need alot more to get there, like universal school vouchers for all children and right-to-work legislation.

But this is a great first step in dealing with the entitled class.

These sentiments are truly how at least 60% of us feel, and probably way more than that.
